3 SAFETY FACTORS IN TISSUE PROCESSING

29th September
2022

Tissue processing is a standard and essential procedure in every histology laboratory. Today's challenge for modern processors is to provide high throughput and productivity, without compromising quality and safety. How to **ensure safety for both specimens and operators** during processing?

Join our Live Webinar *"3 Safety factors in Tissue Processing"* on 29th September 2022 and learn valuable methods for **enhanced safety during processing**. Through live webcams our Application Specialist will discuss the common factors and errors that may negatively impact on safety and how to tackle them, to preserve the specimen, while assuring a safe working environment for operators.

The discussion will include the following topics:

- reagent management
- processing protocols
- sample preservation

September 2022

29

Two time session:
hrs 9.00 am GMT+2
hrs 4.00 pm GMT+2

Estimated duration: 45 min

Join our Live Webinar on 29th September

Reserve your seat by registering to your preferred time session

**Register for
9.00 am (GMT +02)**

**Register for
4.00 pm (GMT +02)**

This date or time do not fit your agenda? No problem! The recording will be sent out to all registrants after the event.

Looking forward to your participation!
