HOW TO BOOST YOUR BIOBANKING P R O C E S S

Thursday 23 March 2023
9 am & 4 pm CET

Biobanking is a relatively new field, evolving in the last 20-30 years. Today, the collection of biological material has become a fundamental resource in medical research. Considering the importance of biobanks and the global health challenges of today's interconnected world, **which are the most effective biobanking techniques?**

Join our Live Webinar **"How to boost your Biobanking process"** on 23 March 2023 and **learn valuable methods for improved biobanking**. Through live webcams, our Application Specialist will discuss the different biobanking techniques that are currently used in Pathology, focusing on the pros and cons of each method. We will **analyze today's challenges in biobanking and how to tackle them**, to control the freezing speed for preserving the specimen through a safe, flexible and standardized approach.
