MICRO-TEK
Ergonomics and Precision for Microtomy

REDESIGN YOUR LAB

The **MICRO-TEK MOTORIZED BENCH** is the ultimate solution for anatomical pathology. Designed to combine comfort and functionality, it allows you to work more efficiently, reducing stress and optimizing every step of the process.

- **Custom Ergonomics:** Continuous height adjustment of the work surface via keyboard or remote control (optional), with the ability to save your preferred positions.
- **Smart Safety:** An anti-crushing sensor ensures maximum safety during use.
- **Robust Construction:** A painted metal frame and a 30 mm melamine work surface that is resistant to common lab solvents. Engineered to eliminate vibrations during cutting. Features a double shelf for mounting monitors and placing various materials.

ALL YOUR INSTRUMENTS IN ONE BENCH

A complete workstation, ready to go. The basic version of the MICRO-TEK motorized bench is more than just a base; it integrates two essential instruments that streamline your workflow.

- **MKF 20 COLD PLATE:** Perfectly integrated into the top, it quickly cools samples, keeping them at the ideal temperature for cutting.
- **HISBATH SLIDE STRETCHING BATH:** Essential for perfectly stretching tissue sections, eliminating wrinkles and artifacts that could compromise analysis.

Details that make a difference :

- **Integrated power outlets** (3x 230V IP55).
- **RJ45 sockets** for connecting Traceability systems.
- **Digital thermoregulators** for precise temperature control.
- **Integrated work surface lighting** for optimal visibility.
- **Cable pass-through hole** for a tidy work area.
